YOUTH MENTORING PROJECT (WA)

Building stronger youth services across Western Australia

PROJECT SUMMARY

The Youth Mentoring Project aims to build the capacity of youth services across Western Australia by identifying workforce skill gaps and developing critical skills through achievable and locally driven training pathways.

Through sector consultation and collaboration, the project creates culturally appropriate training solutions that strengthen service capacity, deepen youth engagement, and deliver place-based approaches – resulting in better outcomes for young people across Western Australia.

EXPECTED OUTCOMES

Skill Sets

Development of youth mentoring skill sets that reflect the needs of the sector and support career development.

Pilot Delivery

Delivery of the skill sets will be piloted in three locations in Western Australia to test and refine the skill sets in the context of local services delivery.
